WELCOME TO ARKANSAS

Arkansas' diverse physical and cultural features, which exist where else, created the Natural State. Scenic landscapes and outdoor recreational activities abound year-round. From the breathtaking Ozarks with their wonderful mountain heritage, to the Delta, featuring its traditional southern accent and meandering river, friendly people will greet you warmly with a "Welcome to Arkansas."

Agriculture, industry, scenic sites, and outdoor recreation contribute to Arkansas' economy. Each component is tied together by an extensive highway network being improved continually by the Arkansas State Highway and Transportation Department. Your safety and convenience are important to us as you travel this Natural State looking for

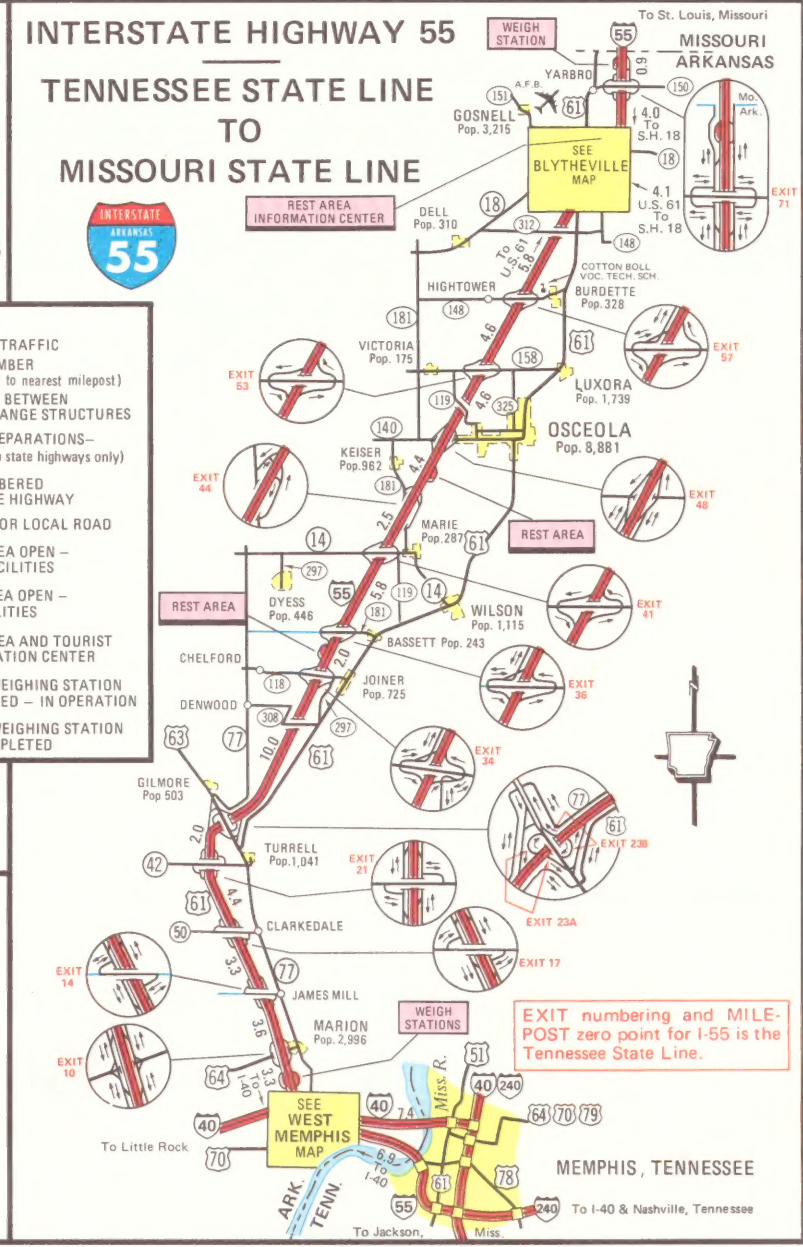

NOTE: EXIT and MILEPOST numbering panels which will assist the motorist in estimating his progress, provide a means of identifying the location of emergency inci-

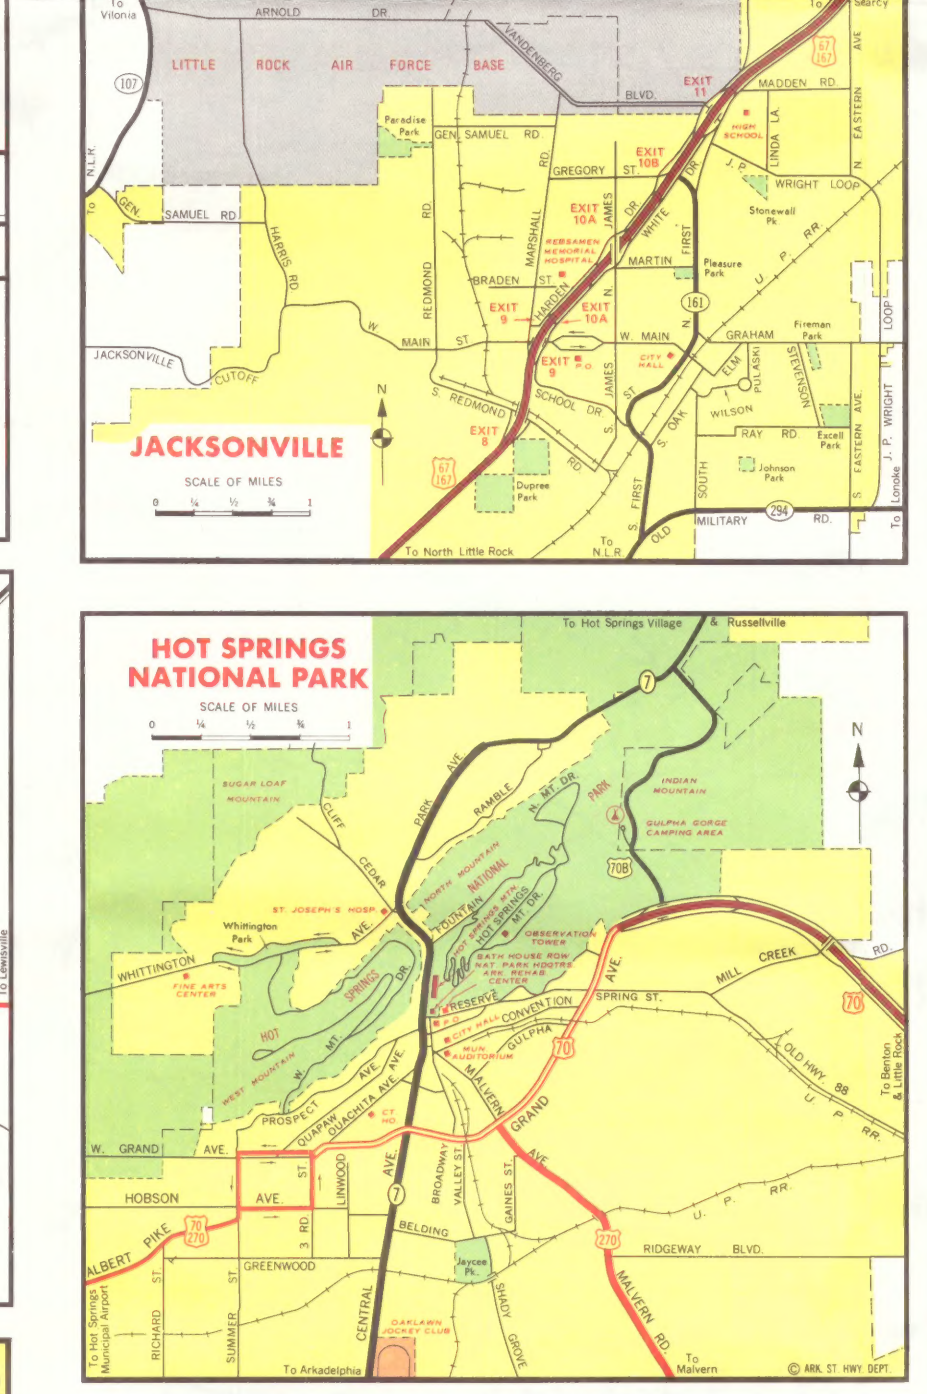

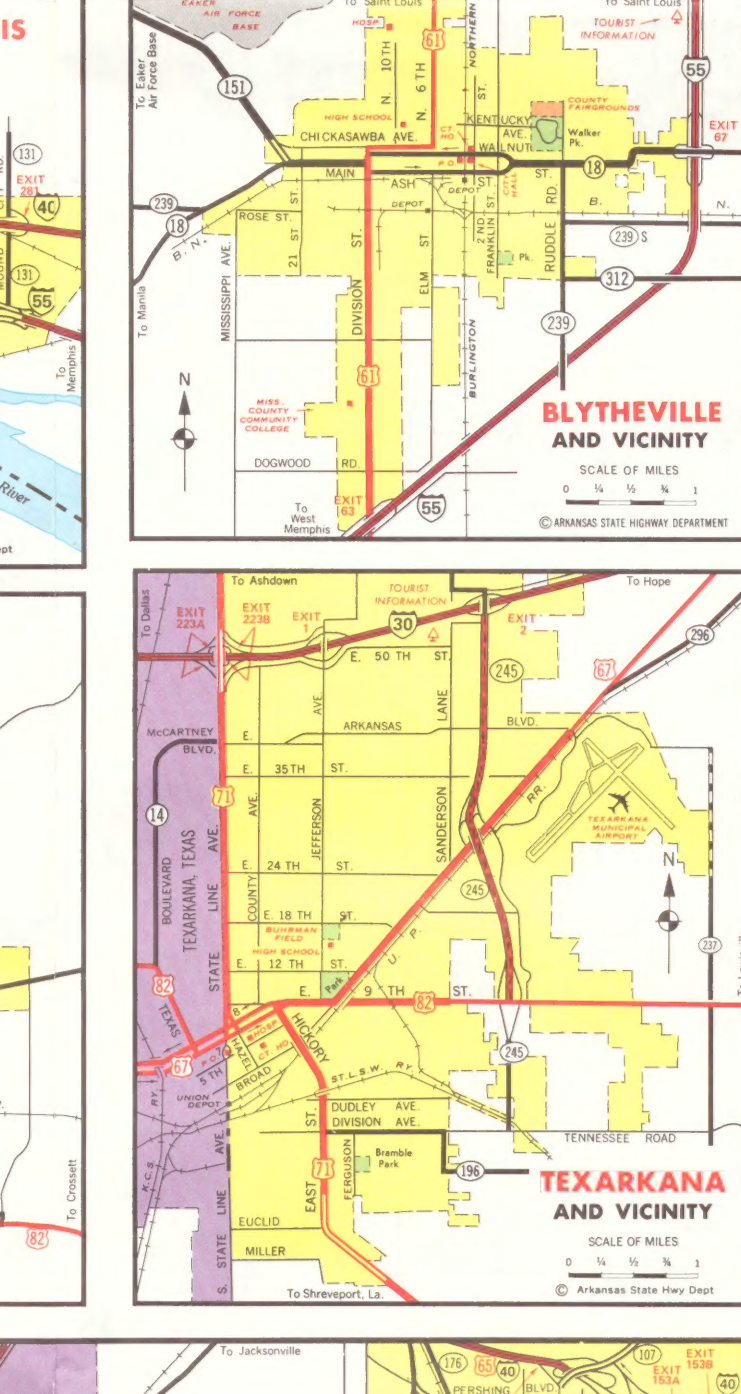

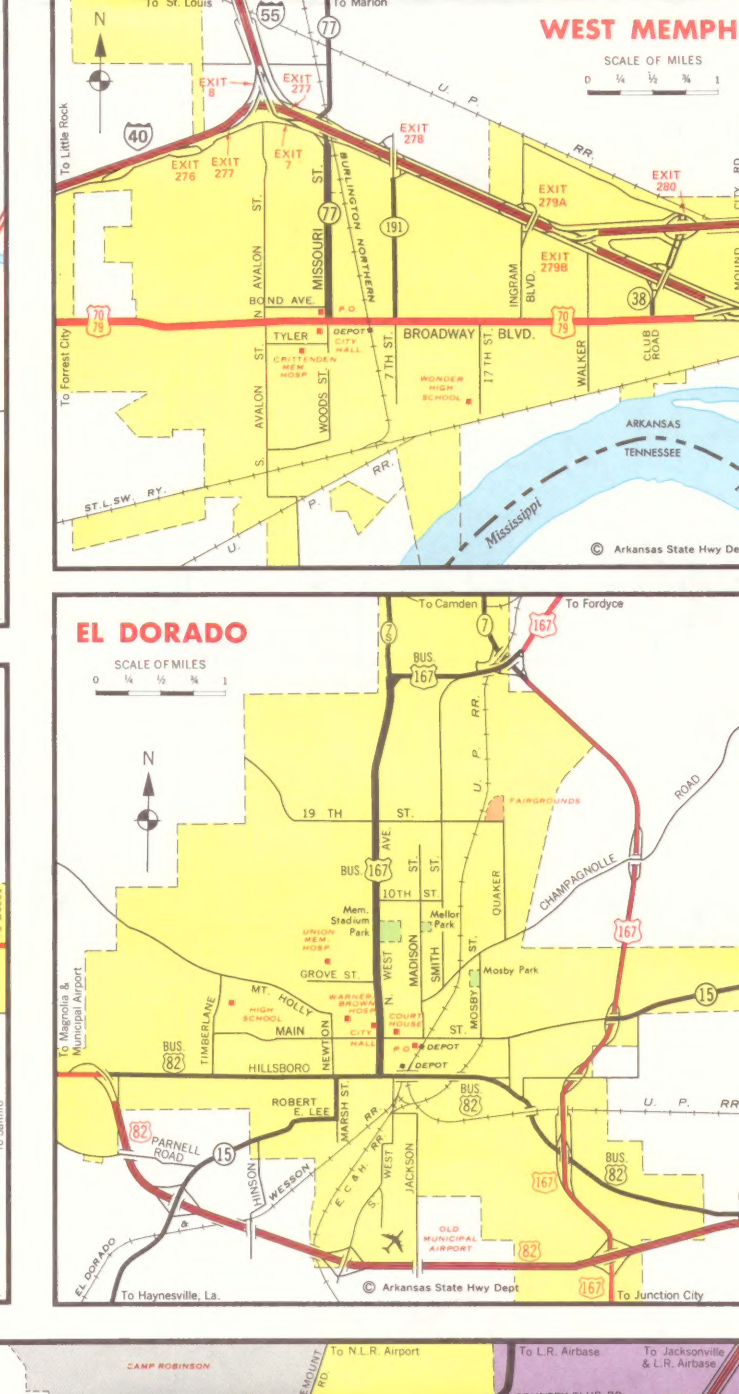

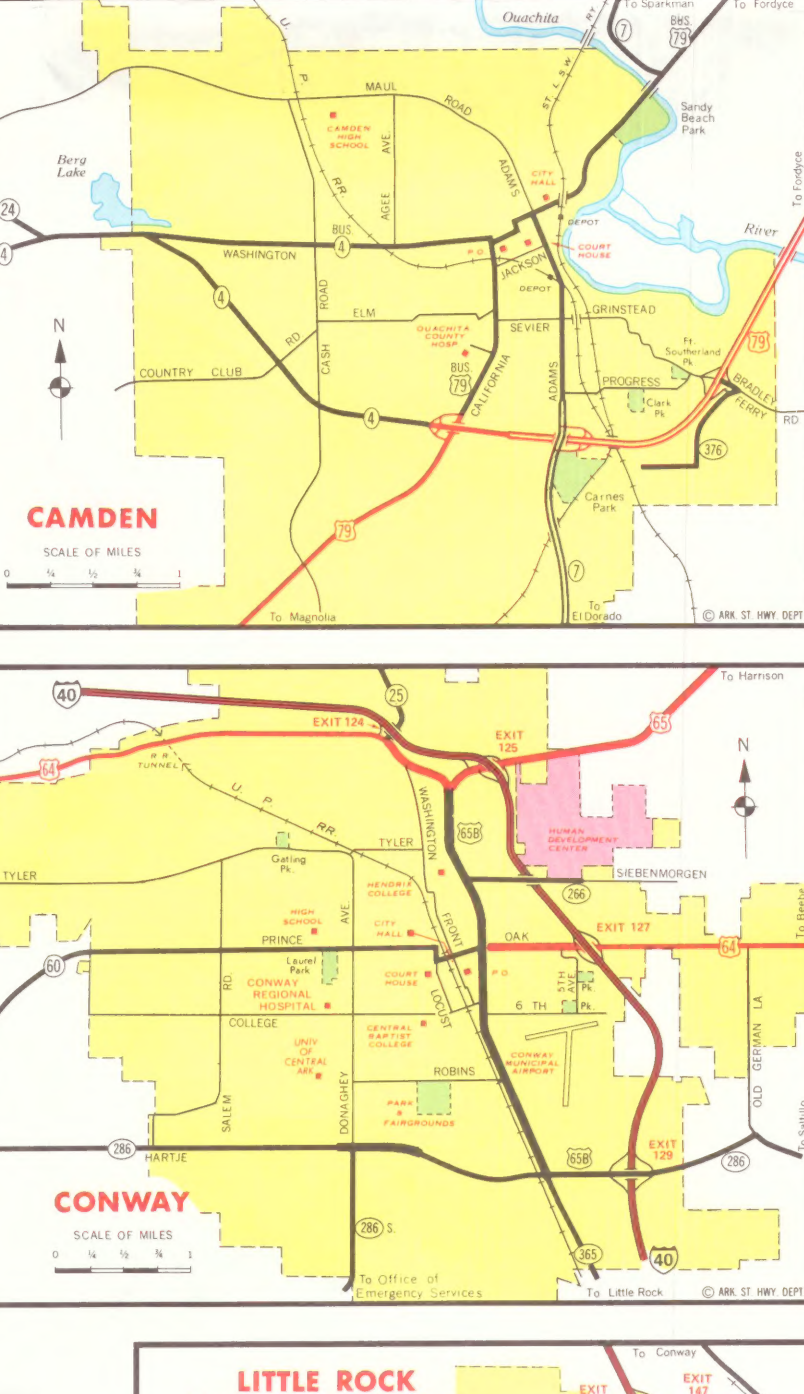

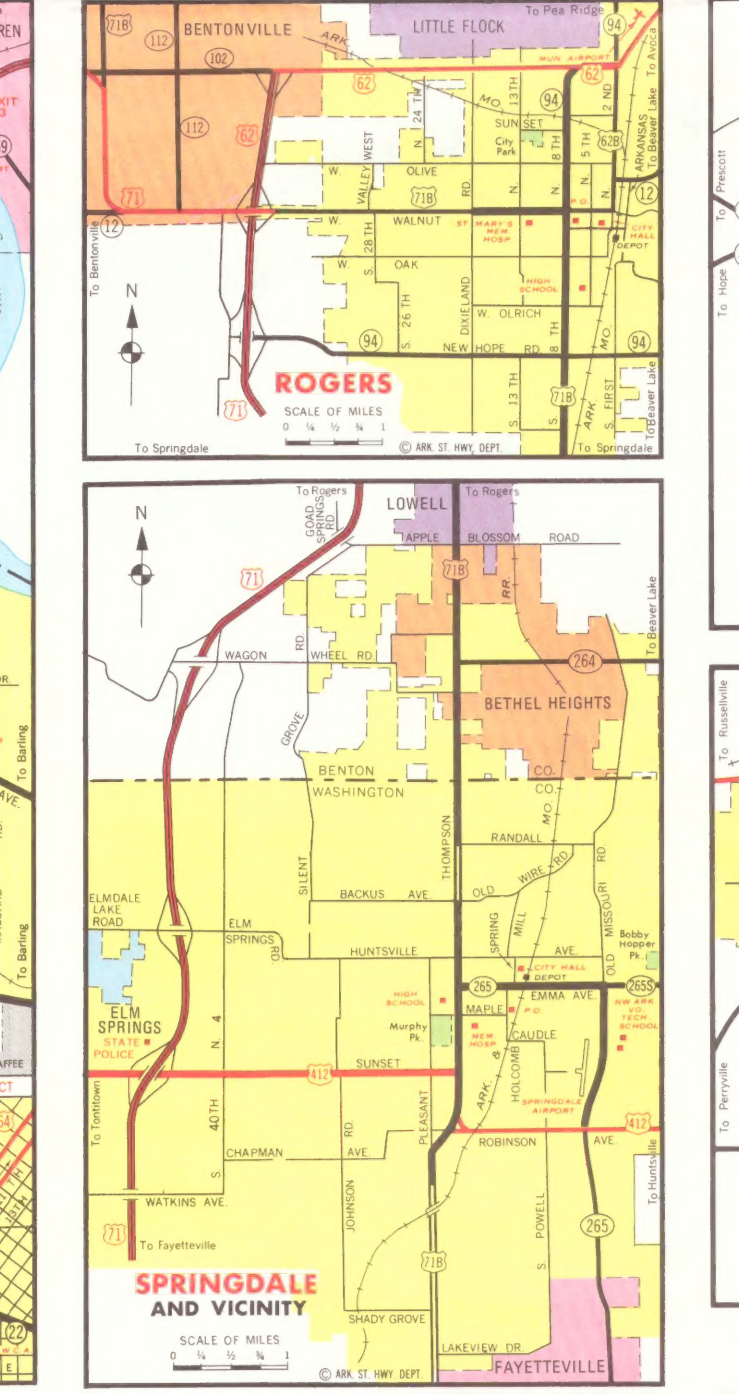

dents and aid in highway maintenance and servicing, have been added to the named destination sign at each Interstate Highway exit point. These EXIT numbers

correspond to the MILEPOST measurement nearest the interchange structure. Both the EXIT numbers and MILEPOST numbers represent the mileage measured

from a zero point, which is where each Interstate Highway enters the State. These numbers increase as you progress from the zero point and decrease as you

TOURIST INFORMATION CENTER
This unusual combination of State Park/Tourist Information Center (TIC) is located on U.S. 63 at the eastern edge of the City of Mammoth Spring. The facility overlooks the 62-acre state park which includes Mammoth Spring, the largest spring in Arkansas and the birthplace of scenic Spring River. Operated by the Arkansas Department of Parks & Tourism, this TIC officially opened on March 16, 1987. A local point is the exhibit area which depicts the role of tourism on the Mammoth Spring area, the colorful history of the region, and the area's diverse natural resources.

FOR HIGHWAY CONDITIONS DURING INCLEMENT WEATHER PHONE 569-2374

USEFUL INFORMATION

PLAN YOUR TRIP
Plan your trip and familiarize yourself with the route which you plan to travel using maps of your travel area.
Plan to travel during daylight hours and in good weather.
Notify someone where you are going, what route you are taking and the license number of your vehicle.
Stop and rest frequently.
DRIVE DEFENSIVELY
Drive defensively and obey all traffic signs. On all highways the speed limit is 55 MPH unless otherwise posted. Never exceed the posted speed.
Signal before you turn or stop.
Let the other drivers know what you are going to do.
Keep a safe distance from the vehicles ahead.
When a school bus stops - you stop! It is unlawful to pass a stopped school bus in any direction when receiving or discharging passengers.
IF YOU HAVE CAR TROUBLE
At the first sign of difficulty, try to get to a service area. If you have a flat tire, get your car completely off the road and turn on emergency flashers before changing the tire. If your car overheats, allow it to cool thoroughly before removing radiator cap to add water.
HOW TO GET HELP
If you need help, raise the hood, and attach a handkerchief to the antenna or door handle.
If you have a CB Radio, ask for help on Channel 9. If there is no response to your call, try Channel 19 or any other channel. When someone answers, ask such person to notify the authorities.
If you are a woman traveling alone, stay securely in your car with doors locked and windows up until help arrives; then remain there until proper identification is made by police or service personnel.
Stay with your car unless help is close by.
IN CASE OF AN ACCIDENT
The driver of any vehicle that collides with another vehicle, a person, or an object must stop immediately and return to the scene of the accident. Immediate notification should be given to the nearest law enforcement agency or the State Police. When accidents result in injuries or death to any person, or property damage in excess of \$250.00, the driver(s) must also, within thirty (30) days, file a written report with the Safety Responsibility Section, State Revenue Division, P.O. Box 1272, Little Rock, Arkansas, 72203. Report forms may be obtained from any of the 118 local branches of the State Revenue Office, most law enforcement agencies, some insurance agencies or the Safety Responsibility Section.
IN CASE OF INJURY
Call for help.
If the victim is threatened by fire, water or other unsafe conditions, attempt rescue. Do not move an injured person if safe from further injury where he is.
HELPING OTHERS
If you see an emergency situation, help by notifying authorities. Be sure to note the exact location and other necessary details. If you have a CB Radio, contact authorities or a base station describing the emergency on Channel 9, 19 or any other channel that answers you. (In many areas Police monitor Channel 9). By radio, alert others of the emergency situation. If you do not have a radio, stop at the nearest telephone and report the emergency.
Do not assume that the accident has been reported by someone else. It is better to report an accident two or three times than to let it go unreported.
If you stop to help, be sure you are completely off the road and put on your emergency flashers.
MEDICAL ASSISTANCE
Hospital access can often be identified by a blue sign with a white "H" or the word "Hospital". Follow the directional arrows to the facilities.
